

Dyslipidemia Chart Audit

PCP _____

Patient Name _____

Age _____

Total number of visits in last year

Number with PCP

Diagnosis

Lipid panel Dates
 Fasting?Cholesterol
Triglycerides
LDL
HDL

Framingham 10 yr risk (using untreated cholesterol levels if available)

LDL goal

Documented?

CAD equivalents?

DM

AAA

PVD

TIA/CVA

Secondary causes?

TSH

liver dx

renal dx

alcohol use

Medications?

Steroids

estrogens

thiazides

beta-blocker

Family history

Discussion of TLC

Nutrition referral

Smoking cessation counseling

Current medications

If on statin – last LFTs

Additional monitoring (fibrates or niacin)

Does this patient have metabolic syndrome?

BMI – proxy for waist circumference

Blood pressure (130/85)

Fasting glucose (110)

HDL (40/45)

TG (150)

On an Aspirin? if Framingham risk > 10%
